

There are four instances where green interventions could be required or encouraged:

Sale of Home  
Substantial Renovation or New Construction

Small Renovation, Remodel, or Addition  
Commercial/Multi-family Properties

Indicate your opinions on each below:

## Sale/Purchase of Home:

No new regulations

OR

Consider the following interventions:

Disclosure of energy usage data to new buyer

Require  Encourage

Energy audit

Require  Encourage

Require home appraisers to have green certification

Require  Encourage

Retrofit on resale

Join County program for water fixtures

Require  Encourage

Further energy saving measures like duct sealing

Require  Encourage

## Small Renovation/Addition:

No new regulations

OR

Consider the following interventions:

Standards for projects that are stronger than existing code in SPECIFIC AREAS:  
more insulation, higher efficiency fixtures, etc.

Require  Encourage

COMPREHENSIVE high performance building standards that go beyond what is required  
by energy and building code.

Require  Encourage

↳ Should 3rd party verification/certification also be required to ensure the performance  
standards are met

Yes  No

>> CONTINUES ON OTHER SIDE >>

**New Construction/Substantial Renovation:**

No new regulations

OR

Consider the following interventions:

COMPREHENSIVE high performance building standards that go beyond what is required by energy and building code.

Require     Encourage

→ Should 3rd party verification/certification also be required to ensure the performance standards are met

Yes         No

→ Should builders be allowed to use LEED or Earthcraft as an alternative way to comply

Yes         No

**Commercial/Multifamily Maintenance or Construction:**

No new regulations

OR

Consider the following interventions:

Retro-commissioning

Require     Encourage

COMPREHENSIVE high performance building standards that go beyond what is required by energy and building code.

Require     Encourage

→ Should 3rd party verification/certification also be required to ensure the performance standards are met

Yes         No

→ Should builders be allowed to use LEED or Earthcraft as an alternative way to comply

Yes         No

**Further Notes or Comments on High Performance Building Standards:**

### Outdoor Lighting:

No new regulations

OR

Consider the following interventions:

Light Trespass Limitations

Yes  No

Fixture Cutoffs

Yes  No

Flood Light Controls

Yes  No

Special Uses

Yes  No

### Notes and Comments:

### Animals:

No new regulations

OR

Consider the following interventions:

Limit the number of allowable chickens

Yes  No

Allow potbellied pigs

Yes  No

Allow pygmy goats

Yes  No
